Early Life and Education

Born Charles Lutwidge Dodgson on January 27, 1832, in Daresbury, England, Carroll was the son of a rector. From an early age, he displayed an exceptional intellect, excelling in mathematics and classics. His family's love of storytelling and imagination fostered within him a deep passion for writing.

In 1850, Carroll matriculated at Christ Church, Oxford, where he studied mathematics and classics. He later became a lecturer in mathematics at the same university, a position he held for 26 years. Carroll's academic career was marked by both brilliance and eccentricity.

The Birth of Alice

It was during Carroll's time at Oxford that he met the Liddell sisters, the daughters of the Dean of Christ Church. Alice Liddell, in particular, captured his imagination, and it was for her that he penned his most famous work, *Alice's Adventures in Wonderland*.

The story began as an impromptu tale told to entertain Alice and her sisters on a boat trip on the River Thames. Carroll's vivid imagination and whimsical humor captivated the girls, inspiring him to write down the story.

Alice's Adventures Published

nonsense and logic, combined with his vivid and imaginative characters, resonated with readers of all ages.

The book's peculiar charm and enduring appeal stem from its dreamlike quality, its exploration of themes such as identity, reality, and time, and its memorable characters, including the Cheshire Cat, the Red Queen, and the Mad Hatter.

Literary Legacy

Beyond Alice's Adventures in Wonderland, Carroll penned numerous other works, including *Through the Looking-Glass, and What Alice Found There* (1871), *The Hunting of the Snark* (1876), and *Sylvie and Bruno* (1889). He also wrote poems, short stories, and mathematical treatises.

Carroll's literary legacy extends far beyond his published works. His influence can be seen in countless works of literature, film, and art. His playful use of language, exploration of nonsensical logic, and creation of whimsical characters have inspired generations of writers and artists.

Eccentricities and Passions

Carroll was a man of many interests and eccentricities. In addition to his literary pursuits, he was a talented photographer, mathematician, and inventor. He was also deeply involved in philanthropy and social causes.

Carroll's eccentric nature was often evident in his personal life. He was known for his shyness, his meticulousness, and his unconventional relationships with young girls.

Later Years and Death

Carroll retired from academic life in 1881 and spent his remaining years pursuing his interests in writing, photography, and philanthropy. He died on January 14, 1898, at the age of 65, leaving behind a rich legacy of literary and intellectual contributions.
