From the Abacus to Artificial Intelligence: 250 Milestones in the History of Technology

Technology has played a major role in shaping the course of human history. From the invention of the wheel to the development of the computer, technology has made our lives easier, more productive, and more connected. In this book, we will trace the development of technology from its earliest origins to the present day, highlighting 250 key milestones along the way.

The book is divided into five parts, each of which covers a different era in the history of technology. Part One, "The Ancient World," begins with the invention of the abacus in Mesopotamia and ends with the fall of the Roman Empire. Part Two, "The Middle Ages," covers the period from the fall of the Roman Empire to the Renaissance. Part Three, "The Renaissance and Enlightenment," covers the period from the Renaissance

to the end of the 18th century. Part Four, "The Industrial Revolution," covers the period from the end of the 18th century to the beginning of the 20th century. Part Five, "The Modern Age," covers the period from the beginning of the 20th century to the present day.

Each part of the book is divided into chapters, each of which covers a different aspect of technological development during that era. For example, Part One includes chapters on the development of writing, mathematics, and engineering. Part Two includes chapters on the development of printing, navigation, and warfare. Part Three includes chapters on the development of the scientific method, the telescope, and the microscope. Part Four includes chapters on the development of the steam engine, the railroad, and the telegraph. Part Five includes chapters on the development of the computer, the internet, and artificial intelligence.

This book is a comprehensive and authoritative overview of the history of technology. It is essential reading for anyone who wants to understand how technology has shaped our world.
